Da sempre riserviamo, al centro della nostra attività, grande attenzione all’etica delle relazioni umane verso tutti gli attori del mondo dello sport: atleti, società, federazioni e rivenditori.

La stessa costante attenzione che dedichiamo alla qualità dei nostri prodotti.
Da qui il nostro impegno nel produrre abbigliamento certificato Oeko-Tex Standard 100 dal 2007.

Consapevoli delle sfide che ogni giorno incontreremo, desideriamo essere al fianco di chi, come voi e come noi, ama la vita e lo sport.

PROSEGUIREMO, CON FIDUCIA, SU QUESTA STRADA, LA NOSTRA.

At the heart of our business we have always focused our attention on the ethics of human relations with all the players in the world of sport: athletes, clubs, federations and retailers.

The same constant attention we devote to the quality of our products. This explains our commitment, since 2007, to producing Oeko-Tex Standard 100 certified clothing.

Aware of the challenges that await us, we wish to walk alongside those who, like you and us, love life and sport.

WE WILL CONTINUE, WITH CONFIDENCE, ALONG THIS PATH - OUR PATH.

Nous avons toujours accordé, au cœur de notre activité, une grande attention à l’éthique des relations humaines avec tous les acteurs du monde du sport : athlètes, clubs, fédérations et vendeurs.

Cette même attention que nous consacrons sans relâche à la qualité de nos produits. D'où notre engagement en faveur de la production de vêtements certifiés Oeko-Tex Standard 100 depuis 2007.

Conscients des défis que nous rencontrerons chaque jour, nous souhaitons être aux côtés de ceux qui, comme vous et comme nous, aiment la vie et le sport.

AVEC CONFIANCE, NOUS POURSUIVONS DANS CETTE VOIE QUI EST LA NÔTRE.

ANTIVIRALE ANTIBATTERICO CERTIFICATO OEKO-TEX®

TI-ENERGY: IL NUOVO FILATO ANTIVIRALE*

Frutto delle più moderne tecnologie nel campo dei polimeri avanzati e dell'esperienza maturata nell'utilizzo delle nanotecnologie iniziata nel 2008, la sezione Ricerca e Sviluppo di Erreà presenta il **nuovo filato antivirale* Ti-energy**.

Si tratta di un importantissimo traguardo raggiunto in ambito tessile ottenuto grazie all'impiego di due distinte tecnologie: la **presenza di nanoparticelle di ossido di zinco** incapsulate in modo permanente nelle fibre di tessuto per ottenere **efficacia antivirale* e antibatterica** e il trattamento **Minusnine J1+** per conferire estrema impermeabilità ai liquidi. Questa duplice funzionalizzazione consente al tessuto di diventare **un'efficace barriera protettiva contro droplet, liquidi, batteri e virus**.

Certificato Oeko-Tex Standard 100, Ti-energy sarà disponibile anche per tutte le società sportive che vorranno utilizzarlo per offrire una maggiore sicurezza ai propri atleti.

*Gli studi condotti hanno, infatti, dimostrato che il tessuto Ti-Energy se messo in contatto in laboratorio con coronavirus HCov-OC43 è in grado di determinare una riduzione massiva della carica virale, pari ad una riduzione di valore log 4,5 dopo 1 ora di contatto. Questo significa che il tessuto Ti-Energy ha dimostrato una capacità di ridurre la contaminazione virale da Coronavirus HCov-OC43 superiore al 99,9% rispetto alla contaminazione iniziale in test di laboratorio.

ANTI-VIRAL ANTIBACTERIAL OEKO-TEX CERTIFIED

TI-ENERGY: THE NEW ANTI-VIRAL* YARN

Fruit of state-of-the-art technologies in the field of advanced polymers and of the experience gained in the use of nanotechnologies since 2008, the Erreà research and development team is presenting **Ti-Energy, the new anti-viral* yarn**.

This truly important achievement in the world of fabrics was made possible by the use of two separate technologies: **the zinc oxide nanoparticles**, permanently encapsulated in the fibres, **have antiviral* and antimicrobial properties, and the Minusnine J1+ treatment** which makes the fabric super-impermeable to liquids. This dual function allows the fabric to form an effective **protective barrier against droplets, liquids, bacteria and viruses**.

Oeko-Tex Standard 100 certified, Ti-energy will also be available to all sports clubs that want to use it to enhance the safety of their athletes.

*Studies have shown that, when exposed to the HCov-OC43 coronavirus in the lab, the Ti-Energy fabric is able to massively reduce the viral load, with a reduction of 4.5 log after 1 hour of contact. In other words, the Ti-Energy fabric was found to have the potential to reduce viral contamination from the HCov-OC43 coronavirus by more than 99.9% compared to initial contamination levels during laboratory tests.

ANTIVIRAL ANTIBACTÉRIEN CERTIFIÉ OEKO-TEX

TI-ENERGY : LE NOUVEAU FIL ANTIVIRAL*

Fruit des technologies les plus modernes dans le domaine des polymères avancés et de l'expérience acquise dans l'utilisation des nanotechnologies, qui a débuté en 2008, la section R&D d'Erreà Sport présente le **nouveau fil antiviral* Ti-Energy**.

Cet extraordinaire succès en matière textile est le fruit de l'association de deux technologies spécifiques : la **présence de nanoparticules d'oxyde de zinc encapsulées qui restent dans les fibres** de tissu pour déployer leur efficacité antivirale et antibactérienne, et le traitement **Minusnine J1+**, qui confère une imperméabilité extrême aux liquides. Cette double fonctionnalisation permet au tissu de devenir **une barrière protectrice efficace contre les gouttelettes, liquides, bactéries et virus**.

Certifié Oeko-Tex Standard 100, Ti-Energy sera proposé également à tous les clubs de sport qui souhaitent l'utiliser afin d'offrir davantage de sécurité à leurs athlètes.

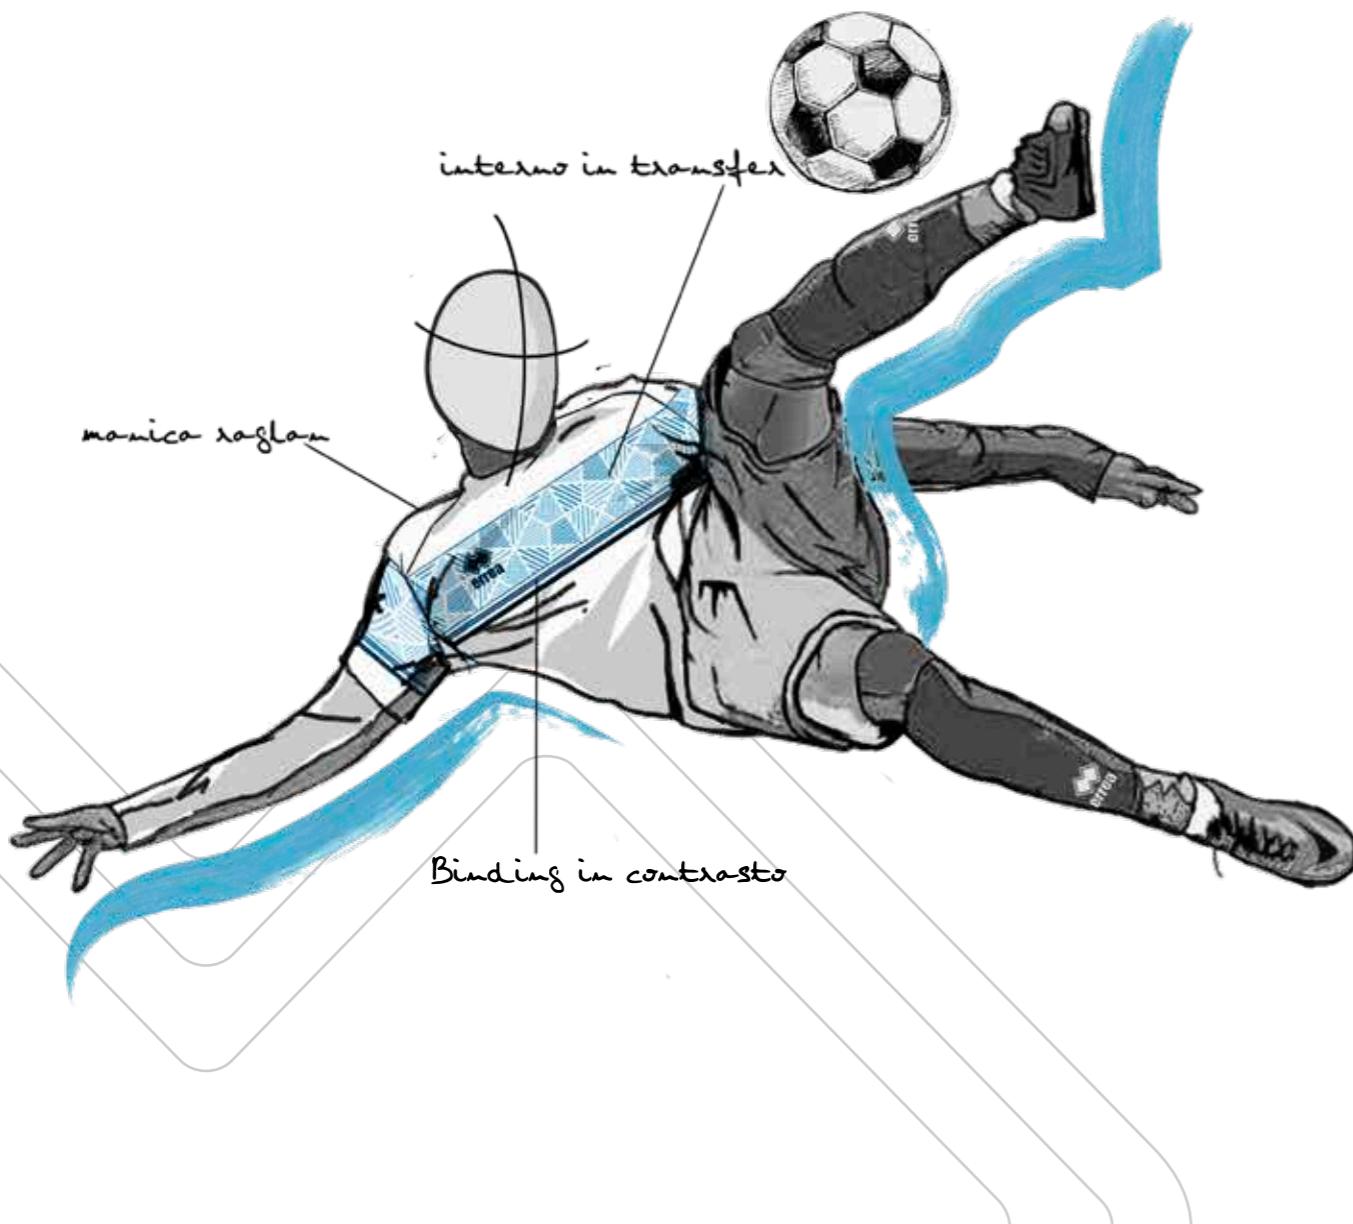

*Les études réalisées montrent en effet que le tissu Ti-Energy, s'il entre en contact en laboratoire avec le coronavirus HCov-OC43 provoque une chute massive de la charge virale d'une valeur log de 4,5 au bout d'une heure de contact. Ceci signifie que le tissu Ti-Energy a prouvé sa capacité à réduire la contamination virale due au coronavirus HCov-OC43 de plus de 99,9% comparé à la contamination initiale lors des tests en laboratoire.

Dal 1988, per vestire lo sport.

Questo viaggio ha inizio nel 1988, anno in cui viene fondata Erreà Sport. Nel nome c'è tutto il sentimento che ispira l'azienda. Il logo Erreà nasce dall'unione della lettera "R" e della lettera "A", iniziali dei figli dei Titolari di Erreà Sport. L'azienda si specializza nella produzione di abbigliamento tecnico sportivo e in breve tempo conquista l'Italia e il mondo. Oggi Erreà è presente in 80 paesi ed è alla continua ricerca di nuovi mercati e nuove sfide.

Gestione diretta della filiera, da produttori.

Presso la sede di San Polo di Torrile, in provincia di Parma, avviene la gestione dell'intera filiera produttiva e lo sviluppo di tutte le fasi di lavorazione del prodotto: dalla selezione delle materie prime alla progettazione dell'aspetto grafico, dalla produzione dei prototipi fino alla consegna dei capi finiti. Questo percorso completo costituisce il vero punto di forza dell'azienda, il plus che la distingue dai propri competitori e le consente di rappresentare attualmente in Europa l'unica azienda ancora produttrice nel settore dell'abbigliamento teamwear. La possibilità di effettuare un controllo accurato e scrupoloso sulla provenienza delle materie prime le permette di garantire la massima sicurezza dei propri prodotti. Perché essere produttori è una scelta.

Erreà nel mondo.

Da tempo l'azienda è conosciuta e si è affermata nei principali mercati in ogni parte del pianeta. In tutta Europa la presenza di Erreà è ormai da considerarsi capillare con una forte penetrazione del marchio in Francia, Gran Bretagna, Spagna, Germania, Olanda e Belgio. Significativa è, inoltre, la rilevanza nell'area mediorientale e nei più importanti paesi del Golfo così come in costante crescita si dimostra il mercato africano. Dal 2014 è nata una sede operativa punto di riferimento per gli Stati Uniti mentre l'America centrale si conferma una zona commerciale particolarmente strategica. Da azienda internazionale, desideriamo essere la scelta numero uno di tutti coloro che, come noi, sono innamorati dello sport e lo praticano con passione.

Kitting out sport since 1988

It all began in 1988, the year Erreà Sport was founded. The name contains all the sentiment that inspires the company. The Erreà logo originated by combining the letters "R" and "A", the initials of the children of the owners of Erreà Sport. The company specialised in the manufacture of technical sportswear and quickly began conquering Italy and the world. Today Erreà is present in 80 countries and is constantly on the lookout for new markets and challenges.

Direct management of the supply chain, by manufacturers.

The entire production chain is managed at its headquarters in San Polo di Torrile, in the province of Parma, Italy, along with the development of all the manufacturing stages: from the selection of raw materials to the design of the graphics, from prototype production right up to the shipment of the finished garments. This complete start-to-finish process is the company's real strength, the plus point that sets it above its competitors, making it the only company currently in the European clothing sector still producing teamwear. Being able to carry out accurate and scrupulous checks on the origins of raw materials makes it possible to guarantee the utmost safety of its products. Because being manufacturers is a choice.

Erreà around the world.

The company has been well-known for a number of years and has managed to assert itself on major markets around the world. Throughout Europe, Erreà's presence can be considered widespread, with strong brand penetration in France, Great Britain, Spain, Germany, the Netherlands and Belgium. Furthermore, its standing in the Middle East is significant, in particular in the most important Gulf countries, while its presence in the African market is constantly growing. In 2014, our operations headquarters were opened as a reference point for the United States and Central America remains a highly strategic commercial area. As an international company, we wish to be the number one choice for all those who, like us, are in love with sport and play with passion.

Nous habillons le sport. Depuis 1988.

L'aventure a débuté en 1988, année de la fondation d'Erreà Sport. Ce nom cristallise tout le sentiment qu'inspire l'entreprise. Le logo Erreà est le fruit de l'union des lettres « R » et « A », les initiales des enfants des fondateurs d'Erreà Sport. L'entreprise se spécialise dans la fabrication de vêtements techniques et sportifs et conquiert rapidement l'Italie et le monde. Aujourd'hui Erreà est présent dans 80 pays et ne cesse de chercher de nouveaux marchés et de relever de nouveaux défis.

Gestion directe de la filière. En tant que fabricants.

La gestion de l'ensemble de la filière de production ainsi que le développement de toutes les étapes de réalisation du produit - sélection des matières premières, projet graphique, production des prototypes et livraison des vêtements finis - ont lieu au siège de San Polo di Torrile, près de Parme. La maîtrise du parcours de A à Z constitue le véritable point de force de l'entreprise, le plus qui la distingue de ses concurrents et lui permet d'être actuellement en Europe la seule entreprise encore productrice dans le secteur des tenues de sports d'équipe. La possibilité de vérifier soigneusement et scrupuleusement l'origine des matières premières lui permet en outre de garantir la sécurité maximale de ses produits. Parce qu'être fabricant est un choix.

Erreà dans le monde.

L'entreprise est connue et reconnue depuis de nombreuses années sur les principaux marchés du monde entier. D'un bout à l'autre de l'Europe, Erreà bénéficie désormais d'un maillage serré avec une forte pénétration de la marque en France, Grande-Bretagne, Espagne, Allemagne, Pays-Bas et Belgique. De plus, son importance au Moyen-Orient, et en particulier dans les principaux pays du Golfe, est significative, de même que sur le marché africain où elle est en croissance constante. Depuis 2014, la marque compte un centre opérationnel de référence pour les États-Unis tandis que l'Amérique centrale se confirme comme une zone commerciale particulièrement stratégique. En qualité d'entreprise internationale, nous tenons à être le choix numéro un de tous ceux qui, comme nous, sont des amoureux du sport et le pratiquent avec passion.

Sviluppo Prodotto

Product Development - Développement du Produit

Il prodotto è al centro di ogni attività. Gli sforzi sulla cura dei capi e sull'innovazione sono concentrati e finalizzati a realizzare prodotti di qualità. Tutti i capi vengono ideati ed elaborati internamente attraverso lo studio dei cartamodelli. Si passa successivamente alla campionatura e poi alla realizzazione e creazione di tutti i campioni dei diversi brand Erreà. Da qui, si passa alla fase di industrializzazione dove tutte le taglie e i piazzamenti vengono elaborati per la produzione in serie.

The product is at the heart of everything we do. The efforts that go into the details of our garments and into innovation are focused and aimed at creating top quality products. All garments are designed and developed internally through the study of paper patterns. Sampling is the next stage, with samples being made and created for all the various Erreà brands. This is followed by the industrialization phase where all measurements and placements are elaborated for mass production.

Le produit est au cœur de toutes nos activités. Les efforts déployés dans le soin apporté aux articles et l'innovation ont pour but d'aboutir à la production de produits de haute qualité. Tous les articles sont conçus et élaborés en interne à travers l'étude des patrons en papier. Viennent ensuite les phases d'échantillonnage, de réalisation et de création de tous les échantillons des différentes marques Erreà. L'industrialisation est la phase finale, dans laquelle les tailles et les placements sont tous élaborés pour la production en série.

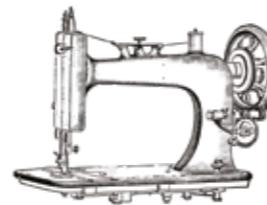

Sartorialità Industriale

Industrial Tailoring - L'art de la Couture Industrielle

Fare propria una cultura sartoriale significa riconoscere l'importanza del ruolo dell'uomo nel processo produttivo. L'impiego di macchine a lame e a laser per il taglio di grandi metrature di tessuto permettono all'azienda di produrre capi in grandi quantità. Anche in questa fase, la conoscenza e l'esperienza del lavoro artigianale, sorveglia il taglio dei capi di ogni singolo centimetro di tessuto.

Mastering a tailoring culture means recognizing the importance people play in the production process. The use of blade and laser machines for cutting swathes of fabric allows the company to produce garments in large quantities. However, even in this phase, the knowledge and experience of craftsmanship is needed to supervise the cutting of garments in every single centimetre of fabric.

Intégrer une culture de la couture, c'est reconnaître l'importance du rôle de l'homme dans le processus de production. L'utilisation de machines à lames et à laser pour la coupe de métrages importants de tissu permet à l'entreprise de produire de grandes quantités d'articles. Dans cette phase aussi, la connaissance et l'expérience du travail artisanal supervisent la coupe de chaque centimètre de tissu des articles.

Linea Produttiva

Production Line - Ligne de Production

In questo reparto vengono assemblate e confezionate le varie componenti che formano un capo Erreà. Attraverso la stampa transfer i capi iniziano ad acquisire la propria personalità. Con il tempo, al procedimento di stampa tradizionale è stata affiancata quella digitale. Infine sono applicate le finiture. È questo l'aspetto chiave che fa dell'azienda una grande "sartoria sportiva" dove l'artigianalità e le mani dell'uomo si incontrano sapientemente con le più moderne tecniche produttive. Tra le protagoniste del processo di confezionamento ci sono le macchine da ricamo, in grado di lavorare decine e decine di articoli contemporaneamente.

In this department the various components which make up an Erreà garment are assembled and stitched. Sublimation printing is then used to give garments their own image and personality. Over time, digital printing has appeared alongside the more traditional printing process. Finally, the finishes are applied. This is the key aspect which makes the company a great "sports tailor", where craftsmanship and the hands of our personnel skilfully come together with the latest production techniques. Among the leading players in the manufacturing process are the embroidery machines which can work on dozens and dozens of articles simultaneously.

C'est dans ce service que sont assemblées et confectionnées les diverses parties formant un article Erreà. Grâce à l'impression par sublimation, les articles commencent à acquérir une image et une personnalité propres. Avec le temps, le procédé d'impression numérique est venu s'ajouter au procédé d'impression traditionnel.

Pour finir, les finitions sont appliquées. C'est cela l'aspect clé qui fait de l'entreprise un grand « atelier de couture sportive », où se fondent de manière unique l'habileté artisanale des mains de l'homme et les techniques de production les plus modernes. Les machines à broder figurent parmi les grands acteurs du processus de confection : elles sont capables de travailler plusieurs dizaines d'articles en même temps.

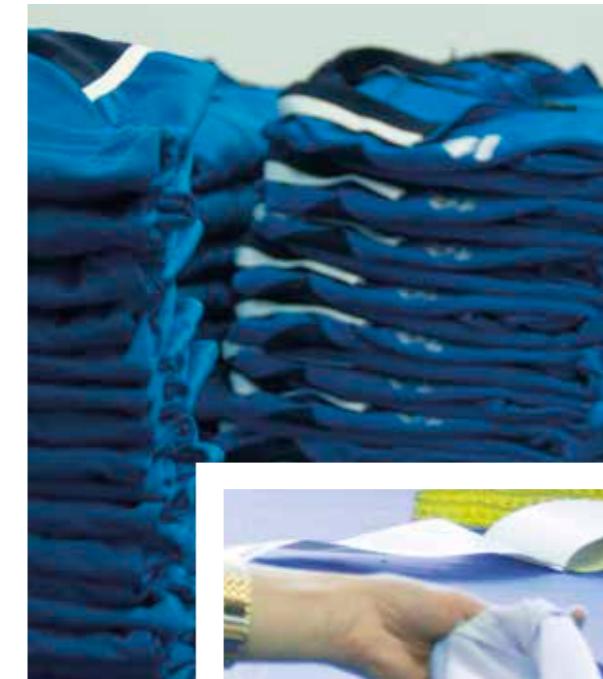

Qualità di Servizio

Quality Service - Qualité de Service

Da qui si passa solo se si è perfetti. Nel magazzino Erreà vi è un'area dedicata dove transitano tutti i capi provenienti dalla fase di confezione. Si tratta di un processo manuale in grado di assicurare il massimo standard di qualità possibile. Solo gli articoli che superano questo accurato esame vengono poi stoccati in magazzino. L'ufficio commerciale Italia ed estero è costantemente a contatto con i clienti di tutto il mondo per offrire un servizio tempestivo, efficace ed efficiente e rispondere alle diverse necessità del cliente in ogni momento.

Only perfect garments make it through this stage. The Erreà warehouse has a dedicated area through which all garments must pass following their manufacture. This is a manual process that ensures the highest possible quality standards. Only items that pass this careful inspection process make it into warehouse storage. The Italian and export sales offices are constantly in contact with customers all over the world, offering prompt, effective and efficient service and responding to their different needs at all times.

Seuls ceux qui sont parfaits passent cette phase avec succès. Le magasin Erreà contient une zone dédiée dans laquelle transiteront tous les articles provenant de la phase de confection. Il s'agit d'un procédé manuel permettant d'assurer le plus haut niveau de qualité possible. Seuls les articles qui réussissent ce test méticuleux y sont ensuite stockés. Les bureaux commerciaux Italie et Étranger sont constamment en contact avec les clients du monde entier pour offrir un service rapide, efficace et efficient, et pour répondre, à chaque instant, à leurs multiples exigences.

Dopo più di 3 anni di ricerche, decine di prototipi progettati e oltre 100 test approfonditi eseguiti da atleti professionisti di oltre 30 sport in gara e allenamento, Erreà Sport® presenta Active Tense®. Progettata grazie alla collaborazione di osteopati, fisioterapisti e atleti professionisti, ACTIVE TENSE® è l'esclusiva e unica linea di abbigliamento dotata di un esoscheleto flessibile interno a ogni capo. Active Tense® è ispirato al concetto di taping e della chinesiologia e studiato con lo scopo di garantire un'ineguagliabile stabilizzazione delle articolazioni e dei muscoli durante l'attività fisica. Il disegno unico biodynamico di Active Tense® e la sua speciale costruzione ergonomica brevettata assicurano una perfetta aderenza al corpo seguendone i movimenti naturali. La speciale costruzione a superfici differenziate consente, inoltre, una rapida dispersione del sudore insieme a una ventilazione efficace in grado di mantenere il corpo asciutto per offrire il massimo comfort. Active Tense® è 100% Made in Italy e certificato OEKO-TEX® Standard 100 per garantire i massimi standard di sicurezza e qualità.

TECHNOLOGY IN ACTION

Following more than 3 years of research, dozens of prototypes and over 100 tests carried out by sporting professionals in more than 30 different disciplines in competitions and training, Erreà Sport® presents Active Tense®. Designed in collaboration with osteopaths, physiotherapists and professional athletes, ACTIVE TENSE® is the only line of sportswear to feature a flexible exoskeleton embedded in each garment. TECHNOLOGIE EN ACTION

Après plus de 3 ans de recherches, des dizaines de prototypes et plus de 100 tests approfondis exécutés par des athlètes professionnels de plus de 30 sports, pendant les compétitions et les entraînements, Erreà Sport® présente Active Tense®. Mise au point avec la coopération d'ostéopathes, physiothérapeutes et athlètes professionnels, ACTIVE TENSE® est une ligne de vêtements exclusive et unique dotée d'un exosquelette flexible inséré à l'intérieur de chaque vêtement. Active Tense® s'inspire du concept de « taping » et de la kinésiologie et a été conçue dans le but d'assurer une incomparable stabilisation des articulations et des muscles pendant l'activité sportive. L'exclusif dessin biodynamique d'Active Tense® et sa spéciale construction ergonomique brevetée assurent une adhérence parfaite au corps en accompagnant ses mouvements naturels. La construction spéciale à surfaces différencierées permet en outre une dispersion rapide de la sueur ainsi qu'une ventilation efficace pouvant maintenir le corps sec pour offrir le confort maximum. Active Tense® est 100% Made in Italy et certifié OEKO-TEX® Standard 100 pour assurer les niveaux maximums en termes de sécurité et qualité.

COME FUNZIONA

L'ososcheleto interno dei capi Active Tense® supporta i movimenti naturali del corpo, migliorando la postura senza limitare la libertà di movimento con un effetto stabilizzante sia attivo che passivo.

STABILIZZAZIONE ATTIVA

La stabilizzazione attiva è un supporto graduale ai muscoli e alle articolazioni che serve a migliorare i movimenti naturali del corpo, mantenendoli nel giusto binario ed evitando movimenti potenzialmente scorretti e dannosi.

STABILIZZAZIONE PASSIVA

La stabilizzazione passiva agisce da guida funzionale, suggerendo al corpo come mantenere una postura più appropriata e coadiuvando muscoli ed articolazioni a mantenere un adeguato allineamento.

Active Tense® aiuta, inoltre, a ridurre le vibrazioni a cui sono sottoposti i muscoli e, quindi, l'affaticamento durante e dopo lo sforzo fisico, e a migliorare la propriocepatività, ovvero la capacità di percepire e riconoscere la posizione del corpo nello spazio, sensibilità fondamentale per il controllo del movimento. Grazie all'elevato sostegno articolare e muscolare, e la conseguente riduzione dello stress corporeo, Active Tense® può anche promuovere un più rapido recupero post-infortunio.

HOW DOES IT WORK

The embedded exoskeleton in Active Tense® garments supports the body's natural movements by improving posture without inhibiting freedom of movement through a combination of active and passive stabilization.

ACTIVE STABILIZATION

Active stabilization offers graded muscle and joint support aimed at enhancing the body's natural movements, keeping them on the right path and eliminating movements that are wrong or unnatural.

PASSIVE STABILIZATION

Passive stabilization is a functional guide that encourages the body to adopt an appropriate posture and helps muscles and joints to stay properly aligned. Active Tense® reduces muscle vibration and therefore fatigue during and after exercise while improving proprioception, the capacity to perceive and recognize the position of the body in space, a crucial aspect of movement control. Thanks to its exceptional levels of support for joints and muscles and the resulting reduction of stress for the body, Active Tense® also ensures improved post-injury recovery times.

COMMENT CELA FONCTIONNE

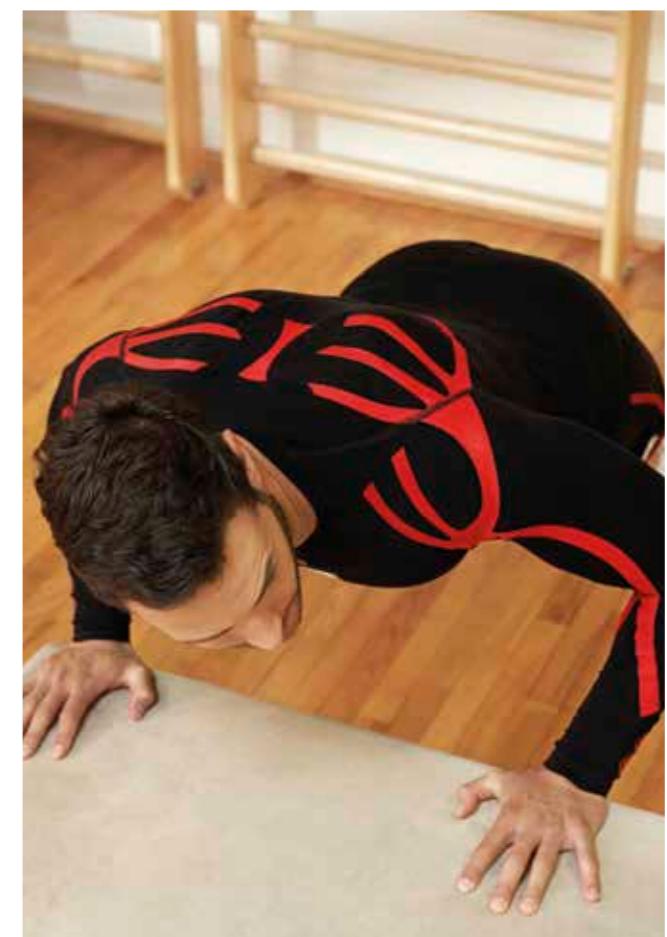

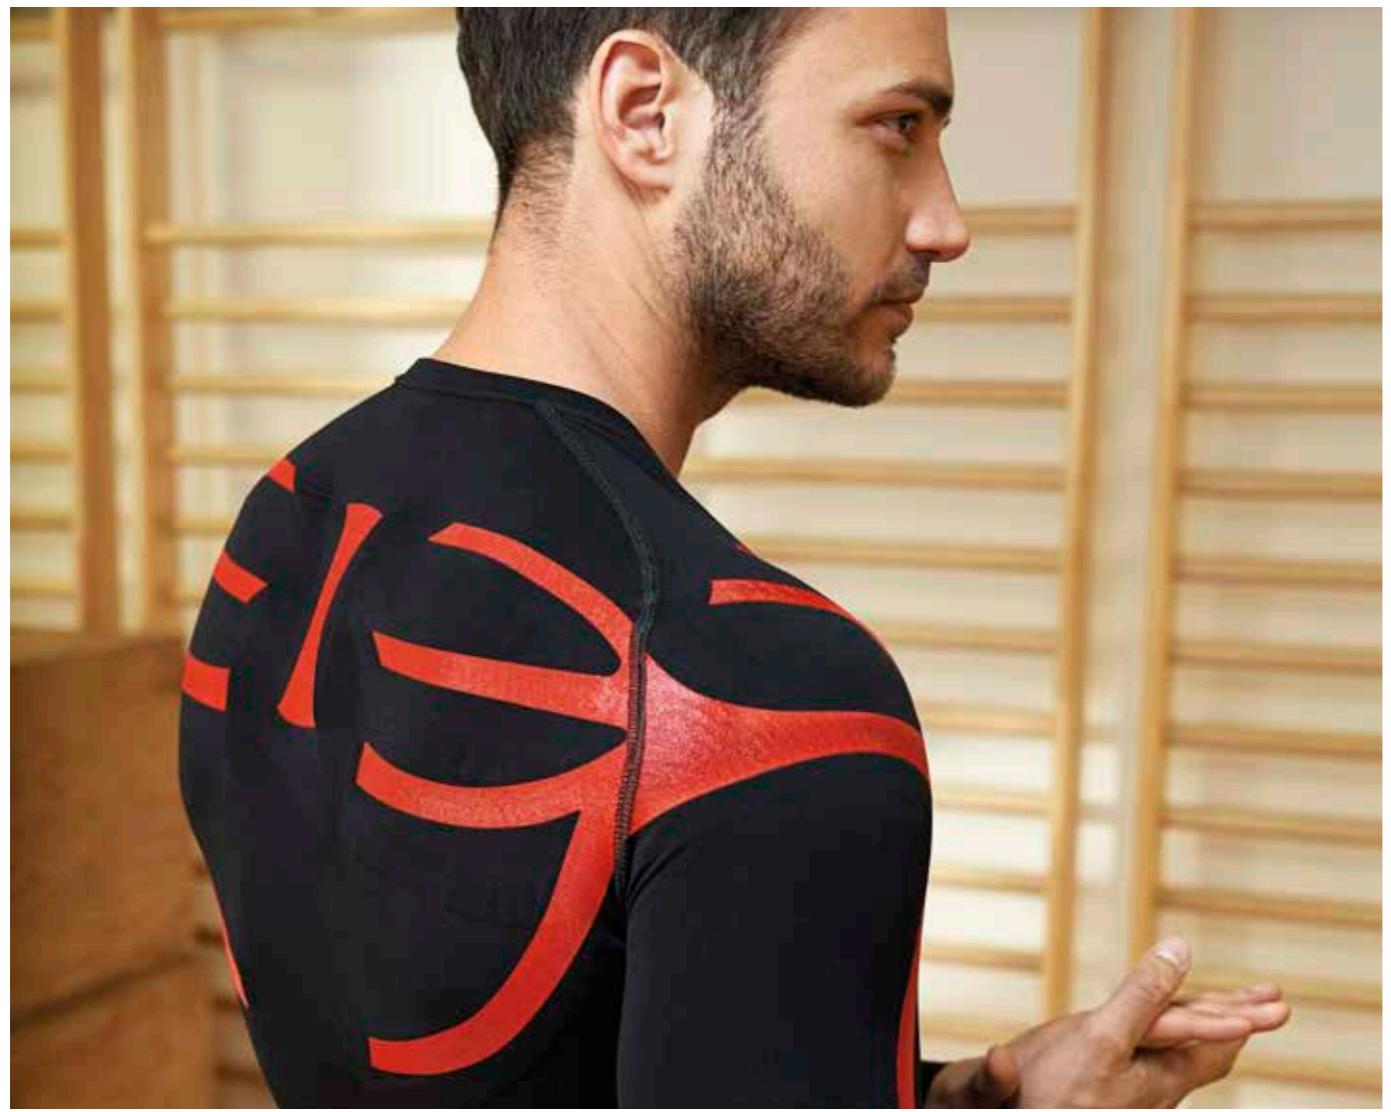

L'exosquelette interne des vêtements Active Tense® accompagne les mouvements naturels du corps, améliorant la posture sans limiter la liberté de mouvement avec un effet de stabilisation actif et passif.

STABILISATION ACTIVE

La stabilisation active offre un soutien graduel des muscles et des articulations servant à améliorer les mouvements naturels du corps, tout en les maintenant dans la position correcte et évitant des mouvements potentiellement erronés et dangereux.

STABILISATION PASSIVE

La stabilisation passive agit comme un guide fonctionnel, aidant le corps à maintenir une posture plus appropriée et permettant aux muscles et aux articulations de maintenir un alignement correct. Active Tense® aide en outre à limiter les vibrations auxquelles les muscles sont sujets et, par conséquent, la fatigue pendant et après l'effort physique ainsi qu'à améliorer leur proprioceptivité, soit la capacité de percevoir et reconnaître la position du corps dans l'espace, ce qui est fondamental pour le contrôle du mouvement. Grâce à l'excellent soutien articulaire et musculaire et à la limitation conséquente du stress corporel, Active Tense® pourrait aussi promouvoir une récupération plus rapide après un accident.
